

With Project AKSHAR

The D.A.V Public School East of Ioni Road has this year taken the initiative to join the AKSHAR project . This project which started in April 2011, aims at the reusing and recycling waste paper, creating entrepreneurial opportunities for marginalized communities, providing affordable educational aids to economically backward students and ensuring recycling of waste paper that would otherwise clog the landfills. Working with the project, the school will be creating extremely affordable, eco-friendly note-books, by re-using one-side-used sheets and recycling fully used sheets that are discarded as waste by various organizations. In the school, the project commences by the initiation of a PROJECT AKSHAR CLUB, which provides a platform for the students to work for the underserved and the environment at the same time.
