

D.A.V. Public School, East of Loni Road, Delhi-93

Dated: 08.06.2020

Dear Parent,

Tremors in Temple

School has always been more than just a building. It is a symbol of trust, cordiality and selfless service. Teachers take care of the young learners whole heartedly. Render affection of mother, friendliness of a peer, firmness of father figure upon them and put their heart out in the development of those tiny tots to a responsible citizen of the nation.

All of this together makes the building of school, a temple of education. But the time which we are living in these days is completely unprecedented. Entire nation has been going through an unending lockdown to minimize the effects of this pandemic. The lockdown has put a lock at the school building also but owing to the dedication of teachers and strong support of the management of school, the teaching-learning process neither did stop for even a single day nor deviated from the planned track.

Virtual live sessions have been started from March 25, 2020, students are provided enriching content of the relevant topics, regular worksheets are assigned to strengthen the concepts, online periodic tests were also conducted for students of class III-XII, students are provided opportunity to participate in various competitions to hone the creative skills, and now students of classes VIII-XII are being provided supplementary classes. All this proves that no lockdown could lock down the efforts of teachers.

As Indians, we know already that a family runs only when all of its members coordinate and co-operate. School is also a family, all its stake holders are the members and affirm the well being of school family.

Needless to say that management and teachers have been playing their role with full responsibility and efficiency and the same is expected from parents as well.

Tough time calls for more strength and this is one of those times. For an institution strength comes from co-operation of its stakeholders and not to forget about the financial strength. No institution can run without financial support of its stakeholders. Fee received from parents is the chief source to meet expenses for a non-profit institution like ours. Some have submitted the school fee in time, really appreciable. But submission by handful parents can't keep the institution alive. Moreover, during lockdown only tuition fee is to be paid, which in itself is not sufficient, therefore payment of outstanding fee amount would also be a big help.

Our school is a source of livelihood for many families. Remunerations of teaching staff, non-teaching staff, support staff, term bills and there are various overhead expenses which are to be met at the end of every month. In clear words, our financial strength is weakening. We need your support. We need you to pay fees on time. This financial crunch obstructs smooth functioning not only of our institution but also of many lives related. We need you to play your part in this tough time as a family member. That's how we can come out of this tough time and keep our very own institution alive.

D.A.V. Public School, East of Loni Road is not only an educational body but it is also doing its bit in the making of nation by giving nation builders since last three decades. This role will continue incessantly provided that we do not fall in short of funds. It's time for parents to take the call and move forward out of this situation hand in hand by paying school fees on time. As an individual each one of us has been trying best to keep ourselves fit. Same goes with our institution also, we have to keep it fit, and we have been doing our bit. Now, it's your turn, pay the school fees on time and take a good care of yourself.

Stay Safe!!!

Regards

Sameeksha Sharma
(Principal)
